## 1. Introduction

CASH ONE is stock management and billing point of sale application. Getting started with CASH ONE is simple, register companies (individuals), products and start stock taking. Stockists and cashiers can take stock using barcode scanners during their purchases and sales, however, scanner is not required. A purchase or sales receipt is issued on every transaction.

(Figure 1)

## 2. CASHONE Software

CASHONE software package is composed of following components:

1. CASHONE POS Server
2. CASHONE POS Client
3. CASHONE CART (Open Source)

<https://github.com/shamszia/windntrees.cashonecart>

### 2.1. Pre-Requisites

4. Windows Workstation or Server Supported with IIS7 (or later)
5. MS-SQL Server 2012
6. Web Browser Client (IE, Edge, Firefox)

### 3. Licensing & Subscription

CASHONE POS software procurement and running is subjected to license subscription. Each license subscription has limited time period of 12 months support.

Support agreement may be extended at 40% of original sales price for the same product.

No	License Subscriptions	Server	Period	Price (PKR)
1	Trial	1	Limited number of uses or trial days	0
